SUMMARY

I am a passionate BCA Data Science student eager to unlock the power of data to create actionable insights. With strong analytical skills and proficient in data analysis, statistical modeling, and machine learning, I seek opportunities to apply my knowledge in the field of data science. I am open to collaborations that enhance my learning from industry professionals.

EDUCATION

 Bachelor of Computer Application CMRU University 08/2022 - 05/2025 Bengaluru	GPA 7.5 / 10
 Pre-university college ST. GERMAIN ACADEMY 08/2020 - 05/2022 Bengaluru	GPA 6.5 / 10

EXPERIENCE

Intern

AiROBOSOFT

06/2024 - 07/2024 Bengaluru

Software Engineer Trainee - Hybrid internship.

- Designed and Implemented as an intern at AiROBOSOFT.
- Developed a tool that converts eye movement into mouse cursor control featuring precise tracking and customizable settings.
- Gathered requirements, designed, and developed the tool, conducting thorough testing.
- Delivered a high-quality and accessible tool enhancing user experience.
- Collaborated on tasks such as project planning, code review, testing, and deployment optimization.

Intern

Academor

02/2023 - 03/2023 Remote

Cyber Security

- Focused on Network Security by monitoring and analyzing network traffic to detect potential threats.
- Ensured compliance with industry standards by participating in security audits.
- Maintained adherence to security policies.
- Certified Ethical Hacker, interfaced using Kali Linux.

PROJECTS

Database Management System

01/2023 - 03/2023 Bengaluru

Database management system project encapsulating railroad reservation functionalities.

- Developed a Railway Reservation Database incorporating entities, attributes, and relationships.
- Utilized Oracle SQL to implement database queries and operations.
- Applied core DBMS principles to design, manage, and optimize the database structure.
- Focused on efficient data organization and seamless query execution.

Food Delivery Website

04/2023 - 05/2023 Bengaluru

Food delivery website project focusing on user experience and payment integration.

- Led a team of four in designing and developing a food delivery website using HTML and CSS.
- Implemented secure payment gateway and ensured optimal web design principles.
- Conducted thorough usability and error-free testing across devices.

STRENGTHS

Analytical and Problem-Solving

Strong analytical skills and problem-solving abilities applied in coding and debugging.

KEY ACHIEVEMENTS

Food Delivery Website Project

Successfully led a team and developed an innovative food delivery website ensuring an optimal user experience.

SKILLS

canva	code review	CSS	Data Science
database management			
database management system	dbms		
Debugging	Django	Github	HTML
Java	Javascript	Kali	Linux
Machine Learning	MongoDB	Netlify	
network security	Oracle	Oracle SQL	
Python	react.js	SQL	statistical modeling
usability testing	Visual Studio		
visual studio code			

PASSIONS

Collaboration and Learning

Eager to learn from industry professionals and explore collaborations in the data science field.
